

A man with a long grey beard and a black beanie stands next to a large black excavator in a forest. He is wearing a bright yellow high-visibility work suit with reflective silver stripes. The excavator has its arm raised, and its headlights are on. The background is a dense forest of tall, thin trees.

SWEDISH WORKWEAR

**WHAT
WORKS
IN SWEDEN**

WORKWEAR COLLECTION 2018

SWEDEN'S GREEN GOLD

Forests cover almost 70% of Sweden and produce renewable energy as well as building and packaging material that is recyclable. Research in nano cellulose will create wood as hard as kevlar, much stronger than steel. In a near future we may see car chassis made from wood.

In the 2018 ProJob Catalogue, we have gone deep into the woods of Vermland, close to the Norwegian border. Here a large forest area is felled by means of the latest machinery and the pine trunks are weighed, measured and quality selected. When a log is landed among the others, it is normally already sold, transport to end destination is booked and on its way to the collecting spot.

NEW COLLECTION GIVES FREEDOM OF CHOICE AND PRIORITY

The PRIO Series is a whole new line of workwear where we through large volumes and smart thinking in purchase can provide garments with a good quality to a considerably lower price.

Furthermore, we have focused on offering PRIO in a wider range of colours, enabling you to create a colour matched dresscode for your company. Check out PRIO on page 100!

PRIO
SERIES

PROJOB
SWEDISH WORKWEAR

WOOD BUILDS THE COUNTRY

With wood as main material in the construction of small houses and, to an increasing degree, large building structures, the building process is not only made with renewable material but also climate smart and sustainable, since the production of massive wood material has an extremely low carbon footprint compared to e.g. brick, concrete, glass and steel.

DISCLAIMER REGARDING THIS CATALOGUE

Prices in this catalogue are recommended prices. VAT, freight and other costs referable to e.g. marking is not included. Projob Workwear reserves itself regarding price changes due to changes in condition beyond our control, such as changes in raw material and production prices, currency changes etc. Projob Workwear also reserves itself regarding printing errors and deviations in color resemblance.

WE REACH NEW HEIGHTS BY KEEPING IN TOUCH WITH THE GROUND

Ergonomics. Functionality. Quality. Maybe our core values are taken for granted. But it takes quite a lot to reach the levels expected by today's workforce and even more to make those accustomed to a certain brand try something new. We the ProJob people must simply be ahead of the big brands to be able to compete. And that's a challenge we gladly face everyday.

ProJob operates from the Swedish westcoast and we are a small but effective and young company that lives in a high level of symbiosis with those who sell our products. Thus we get immediate input from the market. Those who sell our workwear are mostly just as dedicated as we are when it comes to promoting ProJob. That's why it is more fun to be a runner-up on a market than being a leader. We always have to focus on what's most important and to be smart in the way we use our resources.

Our product development consists of a small, competent team and contacts with/visits in our Asian production facilities are frequent. We don't cut back on fabrics and details, as our ambition is to surpass highly set expectations: It is more important that you perceive us as number 1 in quality than in market position.

OUR VIEW ON THE BIGGER PICTURE

MORE ON THE ENVIRONMENT

New Wave Group has two main strategies to decrease our environmental impact and to cut our emission of greenhouse gases. First of all, we must influence the transportation companies that we are working with. Our membership in "Clean Shipping Index" aims to impact the shipping companies to use cleaner vessels by ranking the most high-performing ships. The Group works with some of the largest transportation companies on the market, all of which have environmental programs in place for their operations.

Secondly, we always strive to improve our internal logistics and work methods. Within our group of companies, we club together as much as possible of our shipments and transportations. In addition to protecting the environment, sustainable solutions can also contribute to the streamlining of our operations.

To learn more about our Code of Conduct and our sustainability work, please visit The New Wave Group's homepage. www.nwg.se

We have the possibility to contribute and make a difference through our global operations. ProJob is a part of New Wave Group. New Wave Group is working with social and environmental sustainability under the term CSR (Corporate Social Responsibility). As our customer, you are supporting this work.

WE LIKE SUSTAINABLE PRODUCTS

New Wave Group believes in classic design and good quality products - a concept that will never be out-of-fashion. We hope you will enjoy our products for a long time. All products can be customized to your precise demand, which is a good way to ensure long-lasting use and sustainable consumption.

It is important to New Wave Group that our products are safe and free from restricted chemicals. New Wave Group is a member of the Swedish Chemicals Group at Swerea IVF to receive the most updated information on legislation and developments. This supports our active work to reduce and replace chemicals in line with best available technique. All our suppliers must follow the requirements in our Restricted Substance List. The list has been designed in accordance with legislations such as REACH, but also taking into account industry recommendations and standards. As a result, our requirements are often stricter than the applicable legislation.

IMPROVING WORKING CONDITIONS

New Wave Group is never far away from the manufacturing of our products. Being represented on site enables us to have a close partnership with our suppliers and to actively monitor their business operations. We have a CSR-team, which consists of full-time staff dedicated to visit our suppliers, monitor and support them with various social and environmental topics.

As a member of BSCI, New Wave Group has adopted the BSCI Code of Conduct. It contains requirements on minimum wage, working hours and the prohibition of child labour, among several other requirements from international conventions like to ILO Conventions and the Declaration of Human Rights. New Wave Group has a commitment towards BSCI to engage our suppliers in third party examination by independent auditors.

Having both internal and external audits is a quality assurance to us. We strive for constant improvements and continuous development.

New Wave Group is a signatory member of the pioneering Accord on Fire and Building Safety in Bangladesh. The Accord is a binding contract between brands, international and local trade unions and NGOs. Its aim is to make all garment factories in Bangladesh safe workplaces, which includes a program of safety inspections and a commitment to ensure that the necessary repairs and renovations are carried out. The Accord will have significant impact on the daily lives of millions of textile workers in Bangladesh. We are proud to be a part of this project.

MATERIALS & FABRICS WE USE

COTTON

Cotton is a soft and comfortable natural material. It insulates and ventilates. One of cotton's advantages is that it does not melt when exposed to flames and sparks and that it is difficult to set fire to. Our heavy-duty cotton twill is extra sturdy and durable. This is possible because we ourselves are involved in and direct development from fibre to final production.

POLYESTER/COTTON

The combination of cotton and polyester have proven perfect for making long-lasting garments. The breathability of cotton combined with the durability and colourfastness of polyester make garments in polyester/cotton keep their shape and colour longer. Clothes in polyester/cotton are therefore an excellent choice for hard work that places great demands on both the wearer and the garments.

PRO DRY™

ProDry™ are the materials you wear closest to your skin. They transport moisture and allow it to pass to the outer layer. With ProDry™ there you don't have to have damp and cold garments next to your body.

PRO THERMAL™

Pro Thermal™ are the materials that afford effective insulation against both heat and cold. The materials detect and dispose of surplus heat at the same time that they keep out unneeded cold. Pro Thermal™ keeps body temperature at an even and pleasant level all day.

PRO VENT™

Pro Vent™ are the materials with high breathability. They let out moisture and superfluous heat. They withstand rain, snow and wind. Pro Vent™ are resilient, protective materials worn on the very outside.

PRO TEC™

Pro Tec™ are the materials that afford effective protection against exterior effects. They are very resistant to wear and to tearing. Pro Tec™ is suited to extremely strenuous work in rough environments.

SPUN DYED

Using the traditional dyeing method, the finished fabric is dipped in a dye bath, before being rinsed and then dried. With the spun dyed process, the colour pigment is added before the fibre is spun and the fabric subsequently woven/knitted.

In this way the colour becomes part of the fibre. The woven/knitted fabric achieves much better colour fastness, making it better able to withstand washing, wearing, sunlight and bleaching.

In environmental terms, spun dye is much more eco-friendly than the traditional method of dyeing. As it eliminates a stage in the dyeing process, consumption of energy, chemicals and water is significantly reduced.

MATERIAL DETAILS

VENTAIR™

VENT AIR® is wind and waterproof with breathability. VENT AIR® keeps the body dry and cool while protecting against the forces of weather. The material consists of three-component high-tech weave, a functional material with a coating on the inside and a water-repellent treatment on the outside.

CORDURA®

Cordura® is DuPont's brand of extremely durable polyamide material. It is three times as strong as standard polyamide, up to seven times as strong as cotton and yet is fine and supple. We use it primarily as reinforcement in places that are exposed to hard wear.

YKK®

YKK is a market-leading brand in zippers. The products are of high quality and set the standard for other players in the market.

3M

3M Scotchlite™ person reflex material makes you extra visible when it's dark and the view is bad. The material reflects bright white when it's lit up by the headlights of a vehicle, also when the wearer stands beside the road. 3M Scotchlite reflex material for protective garments exceeds the highest reflex category of the European standards for reflective protective garments, EN ISO 20471, as well as all strict, standardised tests.

Coats epic has set a new standard in the thread market. It consists of a core of polyester fibre around which is spun yet another polyester fibre. The combination makes for a thread with maximal tensile strength, which results in seams with extreme durability.

Duraflex is the trade mark of the high-quality buckles used in ProJob clothes, belts and carrying systems.

THINK COLOUR!

In this year's catalogue we can offer more colours than ever before, largely due to the new PRIO range.

To give you an overview of which garment you can obtain in any given colour, we have created an index from page 196 which show garments divided into colours. Why not put together a whole colour matched collection in your company shade and style? Or find your mix, eg Navy and Red or sky blue and orange? Dare to be colourful and dare to mix!

SKY BLUE - p. 198

BLACK - p. 200

NAVY - p. 202

GREY - p. 204

RED - p.206

FOREST GREEN - p.208

KHAKI - p.210

WHITE - p. 212

YELLOW/BLACK - p. 214

ORANGE/BLACK - p. 216

CLASSIFICATION GUIDE EN ISO 20471

Reflective clothing is personal protective equipment. Personal protective equipment are products that are designed to be used by a person for protection against health and safety risks.

The special demands placed on personal protective equipment in Europe are described in EN-norms. Products that pass these basic safety requirements are allowed to carry the obligatory CE-mark. In order for a safety product to be approved and marked with the CE mark, it must have been tested and certified by an authorized organisation.

HIGH-VIS CLOTHES FOR PROFESSIONAL USERS

These have to be CE-marked and approved according to the norm EN ISO 20471 or EN 471. The norm describes among other things what colours are permitted, where on the clothes the reflecting material is to be placed, and which information that must accompany the clothes. The design of the clothes must also follow certain criteria in order to achieve the best possible visibility. In the norm there are three classes. The norm specifies how much fluorescing cloth and how big the reflective area reflective clothes of each class must have.

CLASS 1

This gives the lowest level of protection. The total fluorescent area must be at least 0.14m^2 and the reflective area 0.10m^2 . May only be used if there is little contact with a few vehicles and/or slow moving traffic.

CLASS 2

Gives a much better protection than class 1, especially in daytime, twilight and fog. The total fluorescent area must be at least 0.50m^2 and the reflective area 0.13m^2 . Class 2 is used in harbours, on railways, building sites, parking places, cross country searches, load bearing vehicles and other places where class 3 is not required.

CLASS 3

This gives the highest level of protection. The total fluorescent area must be at least 0.80m^2 and the reflective area 0.20m^2 . To be used in the proximity of fast moving traffic.

EN ISO 20471 / EN 471

EN ISO 20471 is the latest update of the norm, since this came, garments can no longer be certified according to EN 471. Therefore all new products are certified under the new norm. ProJob working to gradually update all High Visibility garments in the collection according to the new standard. EN 471 is still fully approved to use and will be so for many years to come.

SAFETY CLOTHES

Development is going fast regarding High Visibility safety clothes and ProJob is bent on being in the forefront of the market, not only by new products but also by improving existing items. As an example we have revised a large portion of our High Visibility range and make unique products for the North American market with its in some regards differing legislation.

In Scandinavia we can see how High Visibility is becoming more and more popular off working hours, due to the obvious advantages during the dark part of the year. As a consequence, we see a rising demand in our more advanced High Visibility jackets. This is extra gratifying to us since we have spent a lot of love and hard work into these jackets, which are among the very best on the market today.

FLAME RETARDANT

No collection of workwear is complete without a range of flame retardant products, since light arcs in electric installations are the potentially largest threat to life that can be avoided just by means of clothing.

Our flame retardant garments live up to high-set standards and are all EN ISO 11612 certified. Most of them are also EN 1149-5, EN 13034, EN 61482 and EN 471 certified.

Of course ProJob does its utmost to contribute to a sustainable development and thanks to our new flame retardant materials, we no longer need to use the type of chemicals otherwise associated with workwear. Instead, we use inherent flame protection materials that do not wash or wear off and so protect the environment and surrounding habitat.

You can find more flame retardant facts and information about certifications etc. on our website www.projob.se.

MATERIALS

MATERIAL

Flame-retardants are used to hinder materials from catching on fire or to limit flame spread, but they do not make the materials completely incombustible. There are different methods of flame treatment and different kinds of materials. At ProJob, we have opted for the latest technology where the flame protection is built into the fibres of the fabric. That is, it is not applied to the surface of the fabric as with regular flame treated garments. Therefore, it cannot be washed or rubbed out which makes the flame protection last longer.

Most of our garments are made of modacrylic, cotton and antistatic fibres. Upon contact with fire they release a gas that disperses the oxygen and the flames are smothered without afterglow. The flames do not spread outside the charred area and there is no flaming debris that may stick to the user's skin.

Undergarments are made of wool and Lenzing FR®, a viscose fibre with inherent flame protection with the same qualities as mentioned above.

INFORMATION

Flame treatment is used to prevent flames from spreading, not to protect the body against heat for a long period of time. However, a flame retardant garment can protect against heat a certain amount of time. If used in combination with flame retardant undergarments, this amount of time doubles. The garments must always be worn buttoned / zipped up and user protection is reduced if worn together with non-flame retardant garments. Before use, the user should check the garment for any damages. The user should also be aware of how to take the garment off quickly in case of accident.

We recommend welders to use a leather welding apron to protect the garments from welding sparks. A wet, dirty or sweaty garment provides inferior protection and the garments should therefore be washed often. A garment that has been exposed to flame is depleted and must be replaced. Any mending must be done using material with the same protective standard as the garment. Transfer printing and embroidery may affect a garment's protection. Consult the printer so that the protection is not compromised. Different professions have different protective needs regarding workwear and protective clothing.

CONSTRUCTION & INSTALLATION

This is our most durable product category but then it is also intended to cover a large group of people working with construction and installation, inside and outside, all year around.

Our focus is on material, design and colours that withstand dirt and wear on a daily basis. Still we put extra effort into looking nice and feeling good and comfortable.

This category also spans over many preferences, from the old school classics of workwear to the latest in cut and functionality. Choose what makes you comfortable and do not hesitate to mix with items from other categories, such as Safety and Service, to get your personal blend.

TRANSPORT & SERVICE

Large parts of Today's workforce are occupied with service, maintenance, logistics and distribution and spend their working hours on, or on the road between, different locations.

That is why this product category is adjusted to conditions where focus primarily is on e.g. smart pockets and easy getting in and out of vehicles. And, in between, comfortable working without limitations. Less need for loose pockets and reinforcements, more need for generally durable and comfortable materials. The result is a series of garments that are great to wear during a long work day of work.

PRIO SERIES

We are proud and happy to present a new line of garments, since long highly placed on the wishlist, not least of our customers outside Scandinavia: **PRIO Series** is a line developed with three criterias in mind: High general quality, a favourable price point and width/depth in terms of colours.

If price should be held down while quality is retained, large quantities must be bought and every detail must be thought through. This we have done and we are very pleased with the result.

PRIO SERIES

A close-up photograph of a chef's hand sprinkling salt onto a dish. The hand is in sharp focus, with salt crystals falling in a fine stream. The background is blurred, showing another person in a white chef's coat and a plate with food, including what looks like a piece of meat and vegetables.

KITCHEN & RESTAURANT

As for the collection Kitchen & Restaurant, we have narrowed the range but focused on the essentials and freedom of choice fabricwise. This means that we can offer well fitting and high quality classic kitchen wear in different fabrics.

Our chef's coats are definately worth a closer look, and if you seek comfort and feel beyond the ordinary, we recommend the Exclusive line in fine Egyptian cotton. We can not guarantee it will make you cook like Anthony Bourdain, but you will certainly feel like you do.

As always, we have our kitchen products in good supply all year round, ready to deliver to quality restaurants and kitchens on all our markets.

7407

FUNCTIONAL CLOTHES

When it comes to functional workwear we make no secret of the fact that we closely cooperate with Craft, one of the world's leading suppliers of functional sportswear and underwear. Hard work and sports follow the same principle and the working environment closest to you affects your performance dramatically over time.

This year we can present several new products, especially shell jackets and pants where inspiration derives from outdoor products, with the addition of features that we feel are compulsory on modern workwear. We believe these products to be real favourites both at work and at home.

PROFILE

Also building, transportation and service companies need to show up a clear and uniform corporate profile on their blue collar employees. In the category Profile we create a bridge within the ProJob concept between functionality and display area for your trade mark. We offer plain garments that colourwise connects to products in other segments of our range.

From this year on you will find our immensely popular hoodies from the Pro Generation range under Profile, since we feel they are just perfect platforms for your branding purposes

OUTLET

There are many reasons why fantastic products are phased out, none of them however, makes them less fantastic. Just much cheaper while they are still obtainable in the Outlet.

On the following pages there are some real bargains, yet we have to reserve ourselves for closeouts and the limited possibility to replenish. Take this into consideration as you order and buy a few extra garments!

WASHING INSTRUCTIONS

WASHING

All our garments are properly tested. Each of our garments has its own washing instructions, and it's important to follow these. If a garment is always washed with similar colours and at the recommended temperature, it will stay looking good for longer. "Wash separately" in the washing instructions means that the colour of the fabric may run – for these garments, which may initially have a little extra dye, it is particularly important to follow the washing instructions.

PREWASH

Use the same amount of detergent as in the main wash cycle when prewashing very dirty clothes, but skip the prewash cycle completely for less dirty garments. Soaking garments is not recommended due to the damage which undissolved detergent can do to fabrics.

DETERGENT

Always be sure to use the correct amount of detergent – see the detergent packaging. Choose a bleach-free detergent which is suitable for the temperature of the wash.

DRYING

Only tumble dry as a last resort – if you have enough time and space, hanging garments out to dry is recommended as this is better for your clothes. Smooth out the fabric and the seams before hanging up a garment. When tumble drying, the garment should never be completely dried, as this causes unnecessary wear and can cause shrinkage.

CHOOSE SIZE CAREFULLY

Size is extremely important when it comes to work clothes – it affects function, wear and ergonomics. ProJob clothing is designed with flexibility in mind. Clothes that are the wrong size prevent the wearer from moving around freely. Pockets and other functional details which are used repeatedly during the working day need to be positioned where they can be reached easily. If the clothing is the wrong size, either the positioning of the pockets will force the wearer to make strenuous movements, or the pockets will serve no purpose at all. It's also extremely important for the knee protectors to be in the right place to prevent unnecessary wear. The size also affects how long clothes last – the tighter the garment, the greater the strain on the seams and the fabric.

The ProJob collection includes sizes to meet every need. Almost all our tops are available in XS–XXXL and almost all our trousers are available in C44–C62, D84–D120 and C146–C156 (see Size Guide page 226 for details).

Shows the recommended wash temperature

Delicate cycle

Do not use chlorine bleach

Dry-clean, but do not use chemicals stronger than perchloroethylene

Do not dry-clean

Do not tumble dry

Tumble dry on low heat (50°C)

Cool iron –110°C max, suitable for nylon

Cool iron –150°C max, suitable for polyester/cotton

Cool iron –200°C max, suitable for cotton

Do not iron

Professional leather clean

Do not wring

Hand wash only
